(1)

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 19-23, drawn to a to a method for reducing current drain wherein calculating and adjusting the receiver linearity.
 - II. Claims 10-13, drawn to a method for reducing current drain wherein determining whether inter-modulation products exceed a noise spectrum threshold within the receiver pass-band and calculating and adjusting the receiver linearity.
 - III. Claim 10, drawn a method for reducing current drain wherein determining whether cross-modulation products exceed a noise spectrum threshold within the receiver pass-band and calculating and adjusting the receiver linearity.
- 2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a method for reducing current drain wherein determining whether intermodulation products exceed a noise spectrum threshold within the receiver pass-band and calculating and adjusting the receiver linearity. See MPEP § 806.05(d).

Application/Control Number: 10/630,124

Art Unit: 2685

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group III has separate utility such as to a method for reducing current drain wherein determining whether cross-modulation products exceed a noise spectrum threshold within the receiver passband and calculating and adjusting the receiver linearity. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and different searches are required for each group.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pablo Tran whose telephone number is (703)308-7941. The examiner normal hours are 9:30 -5:00 (Monday-Friday). If attempts to reach the

Art Unit: 2685

examiner by telephone are unsuccessful, the examiner's supervisor, Edward Urban, can be reached at (703)305-4385.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
